

LOG SOURCES

- Firewalls / NGFW**
Palo Alto · FortiGate · Cisco
- IDS / IPS**
Suricata · Zeek · Snort
- VPN Gateways**
logins · tunnels
- Proxies & WAFs**
web gateways
- Routers**
ACL · link events
- Log Forwarders**
rsyslog · Fluent Bit · Kafka
- Files & CSV**
uploads · tailed files

Syslog UDP · TCP · TLS
Splunk HEC · OTLP/HTTP
File tail · Kafka · Upload
queue + disk spill

PARSER STUDIO

new log formats, without writing code

- New Format Detection**
by structure
- Learn from Samples**
tested on held-out
- Human Approval**
named reviewer
- Re-parse History**
chained revisions

samples

unknown formats approved parsers

PROCESSING CORE

one writer for every path · one transaction per batch

- Lossless Capture**
exact bytes
SHA-256
- Parser Cascade**
12 vendor packs
learned · evidence
- OCSF Normaliser**
OCSF 1.1.0
4 event classes
- Source Registration**
by device
hostname
- Hash Chain**
tamper-evident

a line no parser understands is still archived, hashed and chained

OPERATIONS & ASSURANCE

dashboard and API on the same data · every number measured

- Live Dashboard**
10 pages
- Chain Verification**
tamper detection
- Audit Report**
reconciliation · PDF · JSON
- Correlation**
cross-source, with evidence
- Baseline Detector**
5-min features → findings
- REST API**
Swagger UI served offline

STORAGE

SQLite · WAL · one file

- Raw Archive**
byte-exact lines
full-text search

- OCSF Events**
+ chained revisions

- Integrity Ledger**
SHA-256 hash chain

- Format Registry**
formats · parsers

- Delivery Ledger**
every outcome, chained

- Dead Letters**
auto-replay on recovery

stored

Output Router

per-output filters
queues · retries
15 connectors

outcomes

failures

SOC & DATA LAKE

- SIEM Platforms**
Splunk · Elastic · Sentinel
QRadar · ArcSight · Wazuh

- Data Lakes**
Security Lake layout
Parquet · DuckDB · Athena

- Observability**
Loki · OTLP
Datadog · New Relic

- SOAR & Webhooks**
any HTTPS endpoint

- Streams & Relays**
Kafka · syslog CEF / LEEF
GELF · files
