

Log delivery audit report

TRACELOG · report 68D0D120FDEE · generated 2026-09-21T22:03:51 UTC on vm · events from 2026-09-21T22:00:04 to 2026-09-21T22:03:44 UTC

ACCOUNTED FOR All 522 stored events are accounted for at every output.

1. Chain of custody inside TRACELOG

Check	Result	Detail
Raw log lines archived byte-for-byte	522	522 streamed from devices and forwarders, 0 uploaded or sent to the API
Normalised OCSF 1.1.0 events	522	one per archived line; unparsable lines kept as Base Events
Hash-chain records	522	archive, events and chain are the same size
Integrity chain verification	valid	522 of 522 records verified
Delivery ledger verification	valid	457 hash-chained delivery records

2. Delivery reconciliation per output

Output	Type	Owed	Delivered	of which re-sent	Via other output	Filtered out	Dead letters waiting	In flight	Unaccounted	Status
elastic	elasticsearch	522	522	0	0	0	0	0	0	balanced
loki	loki	522	522	0	0	0	0	0	0	balanced
ocsf-archive	file	522	522	0	0	0	0	0	0	balanced
qradar	syslog	522	2	0	0	520	0	0	0	balanced
sentinel	sentinel	522	522	0	0	0	0	0	0	balanced
splunk	splunkhec	522	522	0	0	0	0	0	0	balanced
splunk-dr	splunkhec	522	522	272	0	0	0	0	0	balanced

Owed = stored events since the output was first configured. Owed = delivered + via other output + filtered out + dead letters waiting + in flight + unaccounted. Every outcome is a record in the hash-chained delivery ledger.

Restart recovery: after the last restart (2026-09-21T22:03:35 UTC), 150 events that outputs still owed were sent again from the archive and 25 were recorded as filtered out (done).

3. Dead letters waiting

None. Every event an output could not deliver has since been delivered.

4. Delivery exceptions: outages, rejections, re-sends and re-routes (newest first)

From (UTC)	To (UTC)	Output	Outcome	Trigger	Batches	Events	Detail
2026-09-21 22:03:42	22:03:42	splunk-dr	delivered	auto	2	65	re-sent from dead letters

From (UTC)	To (UTC)	Output	Outcome	Trigger	Batches	Events	Detail
2026-09-21 22:02:21	22:03:36	splunk-dr	dead lettered	live	8	65	undeliverable: ConnectError: [Errno 111] Connection refused
2026-09-21 22:00:15	22:00:15	splunk-dr	delivered	auto	2	207	
2026-09-21 22:00:05	22:00:14	splunk-dr	dead lettered	live	20	207	undeliverable: ConnectError: [Errno 111] Connection refused

5. Log sources

Source device	Vendor	Product	Category	Events	Last event (UTC)

6. Fingerprint

Item	Value
Report SHA-256 (JSON version)	de0c4f0b6718040ce803e470054639dda2d0a33f58ab2304446cae1f7700d64a
Integrity chain head	521f791e18eae164ba3e1305768e20f896d889fb416233c668c2cd25e48f392b
Delivery ledger head	61815b530409167c3dcf6879ad9bece790fe4a33cdc232783660975b60c5cbf7

report_sha256 is SHA-256 of this JSON without the 'fingerprint' key, serialised with sorted keys and no spaces. The two head hashes must still be present in TRACELOG's ledgers (GET /api/integrity/ledger, GET /api/audit/delivery/verify); if either chain was rewritten after this report, they will not match.
